INTRODUCTION
This guide is vital to the identity of the organization. By using the FARA logo and colors cohesively and consistently and communicating the message clearly helps build our identity.

This Style Guide provides mandatory verbal and visual guidelines for FARA's message, logo, colors and typefaces. It also contains examples of how these elements have been incorporated into various types of marketing materials.

This guide is a vital reference tool for everyone at FARA and must be strictly adhered to in all communications materials produced by all units. All questions regarding the Style Guide or preparing any marketing or promotional material for FARA should be directed to Jane Doe. Thank you for your efforts on behalf of FARA.

Dos and Don’ts
• DO refer to this guide when writing or designing any communications materials.
• DO use the official logo on all publications. Download the official logos from our website. Choose from the following formats: EPS, JPG, TIF.
• DO provide this guide to any graphic designer or copywriter that works with you on a project.
• DON’T use any stationery or materials with the “old” logo or create your own logo.
• DON’T be concerned if a project arises that is not covered in detail in this guide. FARA acknowledges that these standards cannot address every situation. Contact Jane Doe with any questions about standard usage.

ELEMENTS OF THE IDENTITY: Logo and Color Palette

The logo combines two important elements: the “FARA” acronym and the full organization’s name. The logo uses red and blue as defined below. These colors are an important part of maintaining consistency of the brand.

When printing in full-color, the logo should be used as shown below and other colors used within the project should complement the logo’s color palette. If the project is in two-color, than use either PMS 200 with PMS 286 or PMS 286 with black. If printing in one-color, you can use either black or PMS 286 – never use PMS 200 as your only color.
