

Friedreich Ataxia -Omic Datasets

FARA is grateful to the research community for continued characterization and subsequent data sharing of datasets from Friedreich ataxia patient samples and animal and cell-based models.

An overview of published transcriptomic, proteomic and metabolomic studies using different FA models is shown below:

Published Transcriptomic FA Studies				
Reference	Method	Sample	PubMed link	GEO database link
Yeast				
Moreno-Cermeño A, Alsina D, Cabisco E, Tamarit J, Ros J (2013) "Metabolic remodeling in frataxin-deficient yeast is mediated by Cth2 and Adr1." <i>Biochim Biophys Acta</i> . 1833 : 3326-37.	Transcriptome profiling by microarray	Conditional yeast frataxin homologue (Yfh1) depletion mutant.	https://www.ncbi.nlm.nih.gov/pubmed/24100161	https://www.ncbi.nlm.nih.gov/gds?LinkName=pubmed_gds&from_uid=24100161
shRNA FXNKD Mouse Model				
Chandran V, Gao K, Swarup V, Versano R, Dong H, Jordan MC, Geschwind DH. (2017) "Inducible and reversible phenotypes in a novel mouse model of Friedreich's Ataxia." <i>Elife</i> . 6 : e30054.	Transcriptome profiling by microarray	Heart, cerebellum and DRG neurons from shRNA FXNKD mouse, WT, and rescue mice.	https://www.ncbi.nlm.nih.gov/pubmed/29257745	https://www.ncbi.nlm.nih.gov/gds?LinkName=pubmed_gds&from_uid=29257745
KIKO Mouse Model				

<p>Coppola G, Choi S, Santos MM, Miranda CJ, Tentier D, Wexler EM, Pandolfo M, Geschwind DH. (2006) "Gene expression profiling in frataxin deficient mice: Microarray evidence for significant expression changes without detectable neurodegeneration." <i>Neurobiol Dis.</i> 22:302-11.</p>	<p>Transcriptome profiling by microarray</p>	<p>3 CNS regions (spinal cord, brainstem, cerebellum).</p>	<p>https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2886035/</p>	
<p>Rai M, Soragni E, Jenssen K, Burnett R, Herman D, Coppola G, Geschwind DH, Gottesfeld JM, Pandolfo M. (2008) "HDAC inhibitors correct frataxin deficiency in a Friedreich ataxia mouse model." <i>PLoS One.</i> 3: e1958.</p>	<p>Transcriptome profiling by microarray</p>	<p>Brain (cerebral hemispheres), cerebellum, and heart.</p>	<p>https://www.ncbi.nlm.nih.gov/pubmed/18463734</p>	<p>https://www.ncbi.nlm.nih.gov/gds?LinkName=pubmed_gds&from_uid=18463734</p>
<p>Coppola G, Marmolino D, Lu D, Wang Q, Cnop M, Rai M, Acquaviva F, Coccozza S, Pandolfo M, Geschwind DH. (2009) "Functional genomic analysis of frataxin deficiency reveals tissue-specific alterations and identifies the PPARgamma pathway as a therapeutic target in Friedreich's ataxia." <i>Hum. Mol. * FARA is working with Giovanni Coppola, PhD at UCLA and the Collaborative Clinical Research Network (CCRN) and others to develop a database of gene expression data from Friedreich's ataxia patients and from mouse models of the disease. The database is available from Dr. Coppola's website at <https://coppolalab.ucla.edu/account/login/>. You will need to register for a password to access the database. Array data is available for some patients who have taken part in natural history studies through the CCRN, so clinical data can be accessed. Additional data is still being added over time, and additional analyses are underway. For more information, please contact Giovanni Coppola: gcoppola@ucla.edu
