

FARA Industry Advisory Summit

The Industry Advisory Summit, or IAS, is an opportunity for industry partners developing therapeutics for FA to engage directly with FARA scientific leadership along with FA experts and thought leaders. As part of the FARA Industry Advisory Summit, industry leaders are invited to participate in these quarterly meetings to facilitate real time information sharing to accelerate the progress in finding effective treatments for FA.

This Industry Advisory Summit will provide a forum where precompetitive initiatives and research being supported and led by FARA can be shared with industry leaders. This forum is not intended for any proprietary exchange or disclosures. Some examples of topics that have been covered in IAS meetings include:

- Meet and Learn from the FA Community: People Living with FA and Parents
- FA Global Clinical Consortium and FA GCC Working Groups
- FARA Resources for Therapeutic Developers

FARA invites you to register for the 2025 FARA Industry Advisory Summit. Each company will designate one person from their organization to be the primary point of contact for communications and meeting planning, however, any number of employees from the industry partner may attend the webinars. For information about registration and pricing, please contact info@curefa.org.

Quarterly round table type webinar meetings will provide the opportunity for a deep dive into the precompetitive initiatives supported by FARA. Attendees are not expected to share confidential information. Instead, these intimate meetings provide access to leading researchers in the FA field and are likely to generate additional areas for precompetitive cooperation. Those attending the Summit are encouraged to bring forward new initiatives to FARA and assist in planning and design of future studies. **We look forward to continuing to work closely with our industry partners in 2025 to provide value and information in an up-to-the minute format.**
